Information Disclosure Statement

The information disclosure statement filed 4/5/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each non-patent literature publication and the JP patent or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. A line has been drawn through it and the information referred to therein has not been considered. The examined checked the parent to see the documents but did not find them there.

New copies are requested.

The US and WO patents have been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no definition of R1 and R2 in the claim however the figure has R1 and R2.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim recites and " prodrugs forms".

The specifications just states that these are compounds with protected groups. These could be at any location and it is not clear which group it would encompass. The substitution of an H with another group would make a totally different compound . Applicants have not clearly stated and described what they would be and which would be the protecting groups.

A blanket statement saying that that it would be a protected group does not place the compounds in the possession of the public and does not convey that applicants had possession of the claimed compounds at the time of filing.

Applicants can over come this by deleting "prodrug forms"

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 4, 6,7,10, 15-17, 19 and 20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21, 55, 66 of copending Application No.10/329,329 Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds would read on the claimed compounds when n2 is 0 and R6 is a heteroatom containing arylalkyl.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Also claim 35 of US application 10/446170.

And claims 35 and 46 of US 10/457034.

Conclusion

The claims are not found to be allowable.
